Art Unit: 2829

1. Restriction to one of the following inventions is required under 35U.S.C. 121;

- I. Claims 1-9, drawn to a device for inspecting element substrate, classified in class 324 , subclass 750.
- II. Claims 10-15, drawn to a method for inspecting element substrate , classified in class 324, subclsss 750.
- III. Claims 16-18, drawn to a method of fabricating a light emitting device, classified in class 445, subclass 24

2. The inventions are distinct, each from the other because:

3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MEP. § S06.05(h)). In the instant case, the apparatus can be used to practice on different method and the methods of group II can be practiced by a different apparatus other than the apparatus of group

II.

4. The inventions I & II and III are unrelated invention.

4 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their divergent subject matter and the search for group I is not necessary for group 11, therefore the restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R 1.143).

6. If group I is elected, a further election species is required as follows

7. This application contains claims directed to the following patentably distinct species of the claimed invention:

- A) species of figure 1A
- B) species of figure 9,
- C) species of figure 11 and
- D) species of figure 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that no claim is generic.

Applicant is advised that a reply to this requirement must include an Identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of Claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 2829

limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species MEP. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(1).

A telephone call was made to Mr. Robinson on 12/12/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH P. NGUYEN whose telephone number is (703) 305-4914.
